

LBMA-i VIPT

Providing the first view into post-trade prices and volumes in the OTC precious metals market

Nasdaq's exclusive LBMA-i VIPT report displays trade volumes in price tranche increments pivoted from the LBMA benchmark auction price. The data feed collates the daily trade volumes and prices from LBMA members, forming an anonymized and aggregated dataset and providing market participants with the most comprehensive view of the precious metals market.

Report Details

Product	Instruments	Metals	Description
VIPT (Volume in Price Tranches)	Spot	XAU, XAG, XPT, XPD	T+ 1 spot volume. Volumes are displayed as tranches at percentage price increments up and down the LBMA's T+1 benchmark price.

What is VIPT?

Nasdaq's LBMA-i VIPT report is the first and only dataset within the precious metal market to provide OTC post trade price data contained within the weight and volumes of the trades. The data displays the executed prices of Spot transactions across the LBMA's memberships share of the OTC precious metal market. The trades are grouped in price tranches according to 0.50% increments from the LBMA auction benchmark price and charted by the volumes of the trades in troy ounces. The innovative product provides insights into the executed prices and the weight of those prices, allowing for analyst into market trends and direction.
